**(54) LASER THERAPY  
DEVICE**

(57) Abstract:

**PURPOSE:** To provide a portable laser therapy device, easy to carry out treatment, by furnishing a laser irradiation part for irradiating the part to be treated with a laser beam emitted by a laser generation part, and embodying a holding means to hold the laser generation part on a human body in the form of a corset or a supporter.

**CONSTITUTION:** This laser therapy device 1 is composed of a laser generation part 2 and a laser irradiation part 3, which are structured in a single piece, and secured to a human body by a corset 4 or supporter as a holding means. Upon connecting the device 1 with the human body in its part with troubles of rheumatism such as neck, elbow, waist and knee, a weak laser beam is emitted by the built-in laser device 1 for irradiation of the part to be treated, which relieves pains of

rheumatism.
